

Hemanth S

 | hs6384013@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

Full-stack developer with hands-on experience securing and scaling a production API platform, working across React, Node.js, Express, and FastAPI.

EDUCATION

RNS Institute of Technology

B.E. in Computer Science and Engineering; CGPA 9.43/10

Bangalore, India

Oct. 2024 – Dec 2028

PROFESSIONAL EXPERIENCE

Software Developer Intern

June 2026 – Present

ENMAZ Engineering Services Pvt. Ltd. | [cognitest.io](#)

JP Nagar 8th Phase, Bengaluru

- Identified and remediated multiple SSRF vulnerabilities in a FastAPI-based API testing platform, implementing DNS-rebinding protection, IP-pinned egress validation, and TLS/vhost-safe connection pinning across all outbound execution paths
- Migrated AI test generation to an asynchronous job architecture using ARQ and Redis, enabling horizontal worker scaling, and redesigned the rate limiter to eliminate lock contention across concurrent workers
- Hardened authentication and secrets management: eliminated hardcoded admin credentials, enforced environment-based configuration, secured Redis with password auth, and added JWT expiry handling with automatic re-authentication
- Built a token usage analytics dashboard for the super-admin panel from scratch — filtering, pagination, CSV export, cross-period comparisons — and implemented token budget enforcement to prevent unbounded LLM API spend
- Migrated the AI integration layer to Anthropic's official SDK with structured outputs, replacing fragile regex-based response parsing, and resolved a foreign-key cascade bug causing silent project deletion failures
- Fixed real-time test execution UX: resolved SSE stream handling for abandoned runs, corrected stale test result/run-count displays, and added security headers (HSTS, X-Frame-Options, Referrer-Policy) across the API

PROJECTS

Pixel-frame | *Next.js, TypeScript, Express, MongoDB, Razorpay* | [GitHub](#) | [Live Demo](#)

August 2026 – Present

- Developed a full-stack studio booking platform with a Next.js frontend and an Express/TypeScript REST API backend, deployed for real client use
- Integrated Razorpay payment gateway with server-side signature verification to securely process bookings
- Built an admin dashboard with slot management, conflict detection, and duplicate-booking prevention logic

Password Manager | *React, Express, MongoDB, Chrome Extension API* | [GitHub](#)

March 2026 – April 2026

- Built a full-stack password manager storing credentials securely using hashing, with a React frontend and Express/MongoDB backend
- Developed a companion Chrome extension for autofill, autosuggest, and autosave of saved credentials
- Implemented a password strength scoring system with a visual metrics dashboard

Multi-Agent AI Decision Ecosystem | *Python, FastAPI, LangGraph, Celery, Redis* | [GitHub](#)

April 2026 – April 2026

- Built a multi-agent debate system where specialized AI agents argue a question from different perspectives before a moderator synthesizes a final verdict
- Orchestrated agent workflows using LangGraph with async task processing via Celery and Redis
- Built a FastAPI backend streaming live debate state to a React frontend visualizing arguments and verdict history

ACHIEVEMENTS & ACTIVITIES

Competitive Programming: Solved 250+ problems on LeetCode, 50+ problems on HackerRank, focused on Data Structures & Algorithms

BigO Club: Member, BigO DSA Club, RNS Institute of Technology

TECHNICAL AND NON-TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, TypeScript

Web Technologies: HTML, CSS

Frameworks: React.js, Node.js, Express.js, FastAPI, Next.js

Libraries: Tailwind CSS, Redux

Databases: PostgreSQL, MongoDB, Redis

Developer Tools: Git, GitHub, Docker, Postman, JMeter, VS Code, Figma, AWS

Core Skills: Data Structures & Algorithms, Object-Oriented Programming

Soft Skills: Teamwork, Problem-Solving, Communication, Time Management, Organizational Skills
